Summary

Passionate and self-experienced full stack web developer specializing in the PERN stack technologies. Patricipated in variety of projects in campus including final year capstone project "Bus Ticket Payment System Using NFC Card" and Self-Developed Web Project - the most exciting one for me - "Tutorial Management Sysytem" which I developed for the purpose of delivering paid coding courses to my clients. All my projects can be found from my github repositories.

Ready to excel in full stack web and mobile app developement navigating through various tech stacks.

Education

Addis Ababa Science and Technology University (AASTU) Bachelor of Science • 3.54 GPA / 4.0
Electrical and Computer Engineering Addis Ababa, Ethiopia • 2020 - 2025

Concentration in Web Development. Relevant Coursework: Introduction to Programmin in C++, Object-Oriented Programming (Java), Introduction to Software Engineering, Data Structures & Algorithms (C#), Operating Systems

Experience

Information Network Security Administration (INSA) Wollo Sefer, Addis Ababa
Junior Full Stack Web Developer Aug 2025 - Oct 2025

- Lead the frontend development of the "Bus Transportation Management Project".
- Got more experience on frontend development using React.js
- Integrated Maps for real time tracking of buses
